

Enfuselle® Hydrating Moisturizer and Enfuselle Balancing Moisturizer Clinical Results

Title of study

Dramatically increases skin resilience and reduces the appearance of fine lines and wrinkles, and significantly improves other critical properties of the skin.

Abstract

Enfuselle Hydrating Moisturizer and Enfuselle Balancing Moisturizer, each containing Vital Repair+®, were clinically evaluated by a board-certified dermatologist at the independent laboratories of the California Skin Research Institute. Two groups of women and men between the ages of 30 and 70 each used a regimen consisting of only their normal cleanser and Enfuselle Hydrating Moisturizer or Enfuselle Balancing Moisturizer twice daily for a period of 28 days. The products were applied to one-half of the face in a controlled and supervised manner. The other half served as the control. The treated and untreated sides were randomized to avoid bias. Subjects were allowed to cleanse the untreated side using only their normal cleanser. No other skin care products were worn by the subjects.

Enfuselle Hydrating Moisturizer

102% increase in skin resilience in 28 days.*

195% decrease in the appearance of fine lines in 28 days.*

211% decrease in the appearance of wrinkles in 28 days.*

Enfuselle Balancing Moisturizer

146% increase in skin resilience in 28 days.*

268% decrease in appearance of fine lines in 28 days.*

173% decrease in appearance of wrinkles in 28 days.*

Conclusion

Enfuselle Hydrating Moisturizer and Enfuselle Balancing Moisturizer dramatically improves skin resilience and significantly reduces the visible signs of aging.

**Some of the Enfuselle clinical studies utilized contralateral (half-face) studies. Bioinstruments were used to objectively measure the depth of fine lines and wrinkles on one side of the face where Enfuselle was being applied and compared these results to the control side where no skin care products or makeup were used. The results of the tests, due in part to the rapidly changing climate conditions, were extraordinary. Where no skin care or cosmetic products were used, the visible signs of aging became measurably deeper, while the skin treated with Enfuselle products steadily improved. In addition to bioinstrumentation, subjects completed a detailed questionnaire following the tests subjectively rating the products' results.*
