THE CHALLENGE

It's 3p.m. You're hungry. And let's face it, dinner seems like it's a year away. You think twice before reaching for a snack, because you are trying hard to lose weight. But eventually hunger wins, and you reach for a candy bar or even some chips. Either way your body is not getting the protein it needs to keep you feeling full and holding on to lean muscle. And you need **lean muscle to fuel your metabolism** and keep you burning calories from fat. So how do you lose weight and retain your muscle without feeling deprived?

THE SOLUTION CINCH BARS

Treat Yourself Every Day

Cinch Bars are the perfect solution to mid-afternoon hunger. Chocolate Decadence, Peanut Butter Crunch, Lemon Cranberry. Whichever flavor you choose, they are a great-tasting way to eat a satisfying, healthy, decadent snack without a lot of calories. Cinch Bars are Powered by Leucine™, an amino acid that signals muscle protein building, which can offset the muscle loss that can occur with other diets. Leucine lets you keep muscle while you lose weight from fat. And remember, **Muscle = Metabolism**.

Shaklee also packs 10 grams of protein in just 120–130 calories. And that's important. Why? Because protein is used to build muscle, and muscle burns more calories than body fat. Protein-rich foods also promote feelings of fullness, keeping hunger at bay. And that's what you want. But when you're eating a Cinch Bar, all you'll think about is how good it tastes.
