

cinch™ Inch Loss Plan

THE CHALLENGE **The Dreaded Diet Cycle**

If you are like most people, you've struggled with your weight at one time or another. You've been on every fad diet. Initially you lose some weight, but then you gain it back and find yourself heavier than before. This is the dreaded cycle of yo-yo dieting.

Yes, in the short term you can lose the weight, but every time you do this you may be doing more damage than good because your body thinks it's experiencing a "famine". In response to that famine, your body goes into survival mode and conserves energy by slowing down your metabolism. Your body does its best to hold on to the fat you have for as long as it can. So, with many diets the weight you initially lose is from fat and muscle. And that loss of muscle slows down your metabolism even further because muscle burns calories. **Muscle = Metabolism.**

There are also common challenges — emotional and other physical ones that come along with dieting. Many diets are too restrictive or monotonous, or leave you feeling deprived and don't teach you how to permanently change your eating and exercise habits. They leave you feeling hungry, tired, and craving the foods you miss most. You've about had it, so you return to your old eating habits and gain the weight back. And the sad part is, the weight you put back on is fat weight.

THE SOLUTION **CINCH INCH LOSS PLAN**

How Cinch Works

The Cinch Inch Loss Plan is different. It addresses one of the primary reasons why other diets fail. Cinch provides you a plan to lose the right way. Instead of losing weight from water and muscle, the Cinch Inch Loss Plan is Powered by leucine™ to help preserve muscle while you lose weight from fat.† Preserving muscle mass also prevents your metabolism from dropping. The Cinch Inch Loss Plan with leucine is scientifically formulated to help you lose weight, lose inches, and break the cycle of perpetual dieting.

The Cinch Inch Loss Plan is designed for real life, so it also addresses the physical and emotional challenges that come along with your weight control efforts. With proprietary formulas, the Cinch products will help you control your hunger, boost your energy, and keep you feeling satisfied. Plus, you'll get healthy personalized menus, specific to your body's needs and your individual preferences.

THE SHAKLEE DIFFERENCE

- Leverages 50 years of **nutritional science leadership and innovation**
- **Clinically tested** — this leucine-enhanced nutrition program was shown to help retain 100% of lean muscle mass.†
- **Powered by Leucine™**, specifically formulated to help you break the diet cycle so you:
 - **Keep muscle** you have
 - **Burn fat** you don't need
 - **Lose inches** you don't want
- **100% unconditional guarantee of satisfaction**

WHO WILL BENEFIT?

- 65% of adults in the United States who are overweight or obese
- Anyone looking for a healthy way to lose weight and inches
- Anyone who is seeking an alternative to the fatigue, hunger, and food cravings commonly associated with typical diets
- Anyone who has been advised by their doctor to lose weight for health reasons

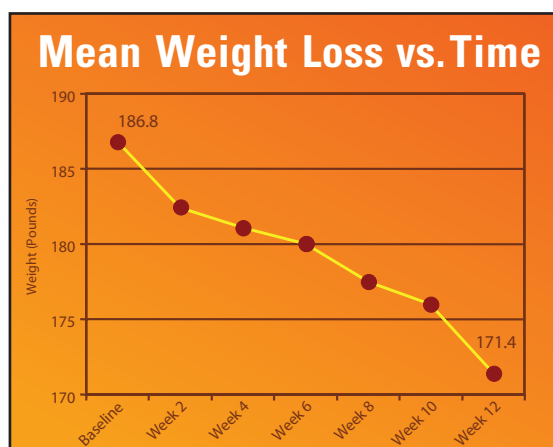

CLINICAL STUDY

SUMMARY OF RESULTS†

- Study participants lost an average 15.4 lbs. over 12 weeks.
- Study participants lost an average of 4.1 inches from their waists and 2.6 inches from their hips.
- Study participants lost on average 16.3 lbs. of fat over 12 weeks.
- Study participants experienced **no significant changes in fat-free mass over 12 weeks.** These data suggest that most, if not all, weight loss was derived from body fat and fat-free mass was preserved.
- More than 90% of study participants reported their energy levels as “very good” or “great” while on the Cinch Inch Loss Plan.

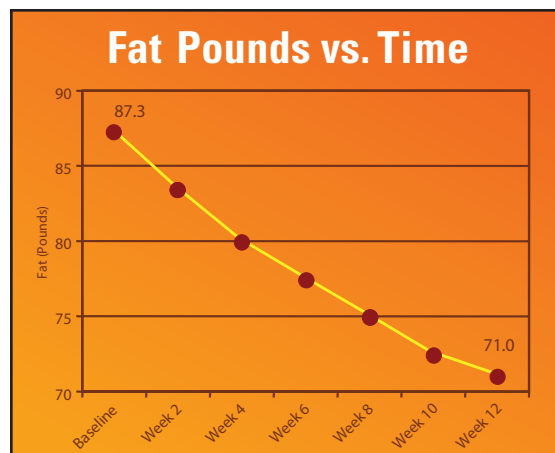

NOTE: For details on the scientific support for each product, please see the individual Product Briefs.

Study participants who followed the Cinch Inch Loss Plan lost an average of **15.4 lbs. over 12 weeks.**†

CLINICAL STUDY (CONTINUED)

Study participants **lost an average of 16.3 lbs. of fat over 12 weeks.**[†]

Study participants experienced **no significant changes in fat-free mass over 12 weeks**, suggesting most, if not all, weight loss was derived from body fat.[†]
