

Basic H²® Biodegradable Super Cleaning Concentrate

NON-TOXIC • NO TOXIC FUMES • NO HAZARDOUS CHEMICALS • NO CHLORINE
• pH BALANCED • FRAGRANCE-FREE • MILD ON YOUR HANDS

INDOORS

General cleaning: 1.25 mL (¼ teaspoon) in a 475 mL (16 oz.) spray bottle filled with water for kitchen appliances, furniture, sealed woodwork, fixtures, walls, stainless steel, bathrooms, and sealed granite and marble. Spray on surface and wipe off with general cleaning cloth.

Windows, mirrors, all glass: 2 drops in a 475 mL (16 oz.) spray bottle filled with water. Glass will smear if more than the recommended amount of Basic H² is used. Spray on surface and wipe off with glass cleaning cloth.

Greasy surfaces: 7.5 mL (1.5 teaspoons) in a 475 mL (16 oz.) spray bottle filled with water for degreasing ovens, stovetops, pots and pans.

Floors: 15 mL (1 tablespoon) in 3.8 L (1 U.S. gallon) of water.

Dusting: 1.25 mL (¼ teaspoon) in a 475 mL (16 oz.) spray bottle filled with water. Spray directly on general cleaning cloth and wipe.

Wallpaper: 30 mL (2 tablespoons) in a pail of hot water. Apply the solution with a dish sponge or a mop and lift off. Use a solution of 15 mL (1 tablespoon) per 3.8 L (1 U.S. gallon) of water to clean off the residue.

Vinyl upholstery: 5 mL (1 teaspoon) in 1 litre of water.

Dishes: 5 mL (1 teaspoon) in 3.8 L (1 U.S. gallon) of warm water.

Pots and pans: 2.5 mL (½ teaspoon) in 3.8 L (1 U.S. gallon) of warm water. Soak as needed.

Knives: Keep your knives sharp by placing 1–2 drops of Basic H² on your cutting stone and keeping it moist. Basic H² won't clog the stone, and leaves it free of residue when rinsed.

Paint brushes (water-based paint): Work a small amount into brushes and wash under the tap.

APPLIANCES

Electric coffeemaker: 1.25 mL (¼ teaspoon) in a pot of water. Run the solution through the cycle and rinse thoroughly.

Humidifiers: Add 3–4 drops to help prevent rust, scum, and mineral deposits.

Irons: 1–2 drops in a steam iron will keep the jet and interiors clean, and make steam wetter. Keeps iron free of mineral deposits, so there's no need to buy distilled water. Note: iron a rag the first time (cleans out any old deposits).

CLOTHING

Spot remover: Apply 1–2 drops directly on the spot and use a soft toothbrush to rub in, then wipe off with a damp cloth or rinse. Removes lipstick, coffee, ink, grass, and grease.

Woolens, nylons, and all fine fabrics: 2.5 mL (½ teaspoon) in a basin of lukewarm water.

Shoes: 2 drops on a wet general cleaning cloth to clean shoes. Shine shoes with a dry general cleaning cloth.

Gum: 2–4 drops to remove gum from carpets or clothes.

OUTDOORS

Outside windows and screens: Spray with a mixture of 5 mL (1 teaspoon) of Basic H² and 7.6 L (2 U.S. gallons) of water.

Grease on barbecue grills and driveways: 7.5 mL (1.5 teaspoons) in a 475 mL (16 oz.) spray bottle filled with water.
