

Vivix®

Powerful protection for your cells

Cells are continuously damaged by environmental exposure, and even the simple act of eating a meal can result in the formation of free radicals. Free radicals can damage cell components such as DNA and trigger normal inflammatory

reactions that are thought to contribute to cellular damage. To help keep cells vital and strong, Shaklee scientists developed **Vivix**.

THE SHAKLEE DIFFERENCE™

The power of nature,
unleashed by science.
Safe. Proven. Guaranteed.

At Shaklee, we're committed to innovating through science and looking to nature for the answers that can provide healthier lives. We ensure the highest quality and safety standards, conducting more than 100,000 quality tests per year to ensure our products are safe for you and your family.

- Backed by five patents, Vivix is a scientific breakthrough designed to help prevent and repair DNA damage
- Contains a natural blend of a broad spectrum of polyphenols, with key ingredients designed to help protect and repair DNA
- Key ingredients in Vivix have been shown in laboratory studies to slow the development of damaging AGE (advanced glycoend-product) proteins that may accumulate and lead to cellular damage

Powerful results in laboratory and clinical studies:

- **HELP YOUR CELLS REPAIR AND PROTECT AGAINST DAILY DAMAGE:** laboratory studies show that **Vivix** key ingredients protect and repair DNA. In a clinical study, key ingredients were shown to blunt the inflammatory response of healthy people to an unhealthy meal, which can lead to cellular damage over time.

DNA DAMAGE

Daily stress, eating a meal, environmental exposure

- **40% LOWER RATE OF TELOMERE SHORTENING:** In a preliminary clinical study, Shaklee users who took **Vivix** had a 40% lower rate of telomere shortening across the adult age range compared with a healthy control group. Telomeres are molecular protective caps of repetitive DNA at the end of chromosomes. Over time, our telomeres gradually become shorter, and telomere length is thought to be a marker of overall health.

SHAKLEE USERS HAD LONGER TELOMERES

13 times
MORE POWERFUL
THAN RESVERATROL ALONE

13 TIMES MORE POWERFUL THAN RESVERATROL ALONE IN SLOWING CELL-DAMAGING AGE PROTEIN FORMATION.*

*In laboratory studies, Vivix key ingredients help slow the formation of AGE proteins, which can lead to cell damage.

THE SHAKLEE DIFFERENCE™

Vivix is a scientifically advanced, proprietary blend is based on the **muscadine grape**: one of nature's rarest, most potent fruits.

- Muscadine grapes contain the full complement of polyphenols found in other grapes
- Unlike other grapes, the muscadine boasts superior concentrations of ellagic acid and ellagitannin, which – when combined with other polyphenols – yield immense antioxidant power
- We harness this muscadine grape power in every bottle of **Vivix** using a patented extraction process that concentrates and preserves bioactive polyphenols

BETTER TOGETHER
